Re: Reissued RCRA Corrective Action Permit

Dear Mr. ~~Carroll~~ *Mike*:

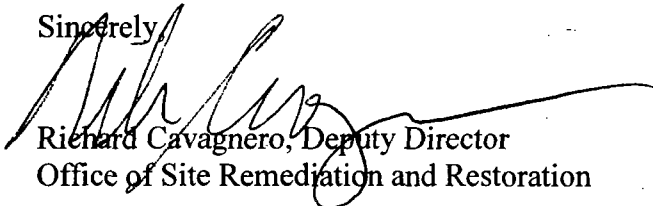

The United States Environmental Protection Agency ("EPA") Regional Administrator has reissued your Permit under the Resource Conservation and Recovery Act, as amended, 42 U.S.C. Section 6901 et seq. ("RCRA"). Under the reissued Permit ("Reissued Permit of 2007"), General Electric Company ("GE"), as the permittee, is required to conduct certain activities at areas affected by releases of hazardous waste and/or hazardous constituents from the GE facility in Pittsfield, Massachusetts.

This Reissued Permit of 2007, which is enclosed, has been prepared for RCRA Corrective Action activities to be performed by GE pursuant to a final Consent Decree. EPA issued a draft of the Reissued Permit of 2007 for public comment from September 17, 2007 to November 16, 2007. EPA received no comments requesting a change in the draft permit. Accordingly, pursuant to 40 C.F.R. Section 124.15(b), the Reissued Permit of 2007 is effective upon issuance by the EPA Regional Administrator.

Regulations at 40 C.F.R. Section 124.19 provide requirements for appeals of RCRA Corrective Action Permits. In this situation, however, as there were no public comments requesting a change in the draft Permit, and EPA has made no changes from the draft Permit to the Reissued Permit of 2007, there are no opportunities for appeal of the Reissued Permit of 2007.

Please contact me if you have comments or questions in this regard.

Sincerely,

Richard Cavagnero, Deputy Director
Office of Site Remediation and Restoration

Enclosure
